N.S.S.®
Neuro Signature System
NEURO SIGNATURE SYSTEM

Neuro Signature System (N.S.S.) has been developed by Axxonet using the unique Brain Signature Profiling Technology Developed by Dr. C.R. Mukundan.

N.S.S. can aid in crime investigation, and help gain a deeper insight in many crime related cases by confirming existing information and revealing new information.

Dr. C.R. Mukundan started working on this technology in the mid nineties in his Neuropsychology laboratory in, NIMHANS Bangalore, where he was a professor of clinical psychology and headed the Neuropsychology clinical unit and research laboratory. In 1999 he was able to evolve a new set of algorithms based on which Axxonet built N.S.S.

Developed by Axxonet
Uses Brain Signature Profiling technology
Used since 1999
700+ criminal cases examined
Independently Validated by Government Study

POLICE
MILITARY
NATIONAL SECURITY

SENSITIVE POSTS
TERRORIST SCREENING
SUSPECT SCREENING
ESPIONAGE COUPS

TRAFFICKING
CRIMINAL CASES
FINANCIAL FRAUD

SMUGGLING
NARCOTICS BANNED SUBSTANCE
GET A SUSPECT’S BRAIN TO TALK TO YOU

Validate the presence of experiences a person has gone through - Directly from the subjects brain, no response required.

Supports Probes in any spoken Language
Non Invasive Test
Requires NO Response from the Interviewee
Test Lasts from 30 to 60 minutes
Easy setup of Interviewee
Human readable Report
Reports Experiential Knowledge
Very High test Accuracy

“The subject does not offer any response to the probes, avoiding need for response selection and consequential response conflict.”

DR. C.R. MUKUNDAN
All crime is a kind of disease and should be treated as such

Mahatma Gandhi
